User Guide: CalOMS Update/Discharge

General Information

The CalOMS Update/Discharge document is utilized in SmartCare to complete the information gathering for clients for county level state reporting. Client require regular updates to be done for reporting. This document is also required to be completed upon program discharge. The data from the completed document is now eligible for batching and submission.

Navigating to and Creating the CalOMS Update/Discharge Document

From the Client Search or Quick link

You can create the document from the client tab. In order to do this, you must first search for the client or select the client from your primary list in client search drop down.

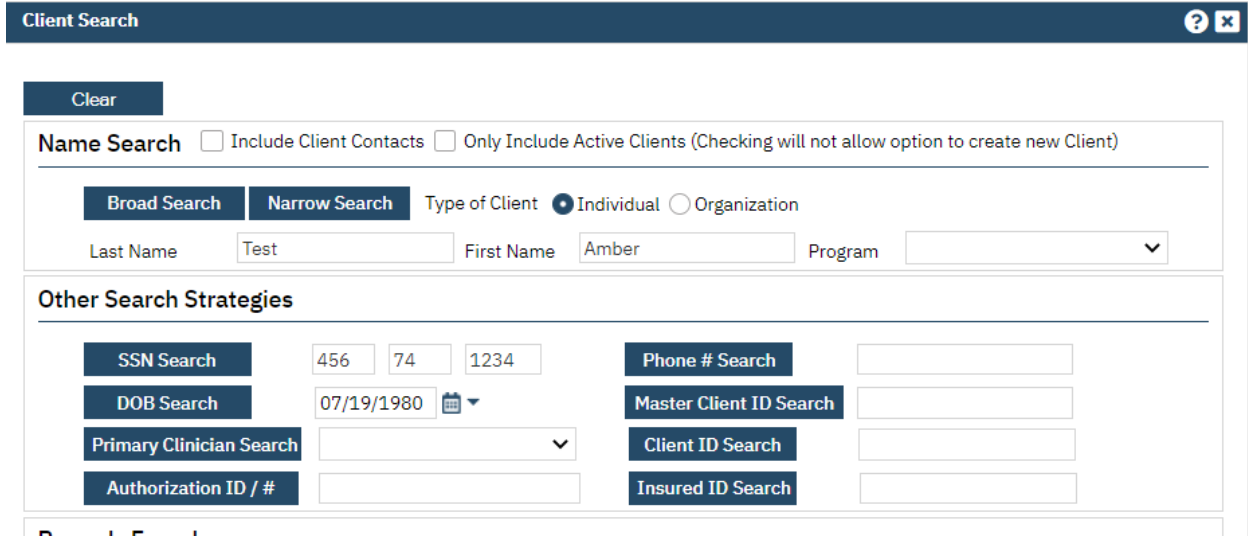

Navigate to the 'Person Icon'. Click the dropdown and select 'Client Search' or choose the client name in the drop down. If using search functionality, see below:

You will be presented with the 'Client Search' screen. On this screen, you will be able to search for a client by a number of parameters.

- Broad Search - Allows for the search of a client by name, partial name, sounds like.
- Narrow Search - Returns for search of exact name match
- SSN Search - Social Security Number search
- DOB Search - Date of Birth search
- Primary Clinician Search - Search by assigned primary clinician
- Authorization ID/# - Search by authorization ID or number recorded in SmartCare
- Phone # Search - Client phone number search
- Master Client ID Search - Used in Care Management; Search by client's Master Record ID. Your organization will not use this button.
- Client ID Search
- Insured ID Search-search by insurance ID.

Upon opening client search you will note that the only button to the bottom right that is actionable is 'Cancel.' Your client should already exist at this point of your workflow, so you can enter information in each of the fields you would like to use for a search parameter and click the corresponding search button for each, as shown outlined in below.

The screenshot shows a 'Client Search' window with a dark blue header. Below the header is a 'Clear' button. The main search area is titled 'Name Search' and includes two checkboxes: 'Include Client Contacts' and 'Only Include Active Clients (Checking will not allow option to create new Client)'. There are two search modes: 'Broad Search' and 'Narrow Search'. The 'Type of Client' is set to 'Individual' (radio button selected) with 'Organization' as an alternative. Search fields include 'Last Name' (containing 'Test'), 'First Name' (containing 'Amber'), and 'Program' (a dropdown menu). Below this is a section titled 'Other Search Strategies' containing several search options, each with a corresponding input field: 'SSN Search' (with three separate boxes for 456, 74, and 1234), 'DOB Search' (with a date field containing 07/19/1980 and a calendar icon), 'Primary Clinician Search' (a dropdown menu), 'Authorization ID / #' (a text field), 'Phone # Search' (a text field), 'Master Client ID Search' (a text field), 'Client ID Search' (a text field), and 'Insured ID Search' (a text field).

If the client for whom you are searching already has a record in SmartCare, you will have the ability to select the existing record.

- Select - This will open the selected client's record

Click the 'Select' button to open the existing client. Once the client has been opened, you will note that there is a new tab open with the client's name and ID displayed.

This is the client tab. When a client is selected, the client's name will appear on the toolbar. This is where you will be able to create the CalOMS Update/Discharge document.

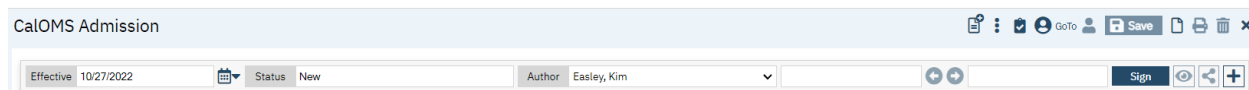

By using the magnifying glass to search for the CalOMS Update/Discharge document you can search for the assessment or locate the assessment using a quick link.

CalOMS Update/Discharge Document

General

Under the CalOMS Update/Discharge Document label, note the information pertaining to the status of the document.

CalOMS Admission

Effective 10/27/2022 Status New Author Easley, Kim

Sign

We will explore these fields more thoroughly when completing the CalOMS Update/Discharge document. However, note at this time that an effective date will be required to complete the document and it is defaulting to today's date. This default is configurable and can be changed, depending on your organization.

Beneath the authorship, status, and effective date fields, information in the CalOMS Update/Discharge document is broken out into two possible tabs:

- CalOMS Information
- SUD, Medical & Mental Health

In completing your client's CalOMS Update/Discharge document, you will navigate across the tabs, left to right, beginning with Update/Discharge, but you can jump around as often as you like, as long as all required fields are completed prior to signing.

Each tab on the CalOMS Update/Discharge, as you will note throughout SmartCare, is broken out into sections. We will look at each section per tab in turn, paying specific attention to which fields have been required by your organization.

- County of Submission – Not seen in screenshot above
 - If your organization is the county level provider or a CBO who only reports to one county, then this field will not show due to configuration. See Set Up Considerations – Configuration Keys section for more information.
 - If your organization is providing services on contract for more than one county and will report to the counties, then you must select the county from this drop down. Your organization can hide counties that you do not provide services for within the global code category. See Set Up Considerations – Configuration Keys section for more information on how to hide counties from the drop down.

Completing the CalOMS Update/Discharge Document

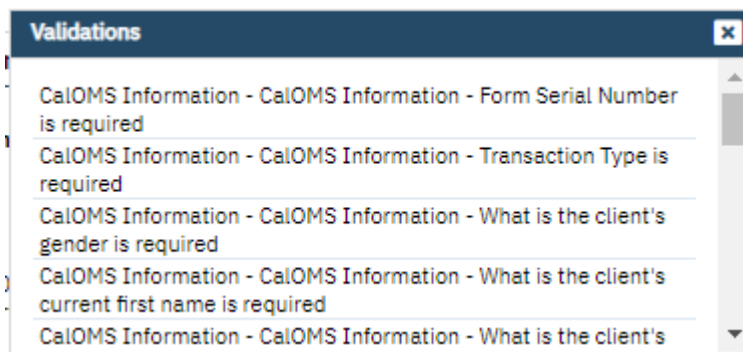

Now, you have two options: sign or save. If there is a compelling reason not to complete and sign the document, it can be saved and returned to at a later time by clicking the save button in the toolbar.

However, keep in mind that if the CalOMS Update/Discharge document is not signed information will not initialize into the client record, where applicable. To sign the document, it is not required that you save it first. Signing will both save and sign the document. First, ensure that the document has an effective date, and then click the blue 'Sign' button.

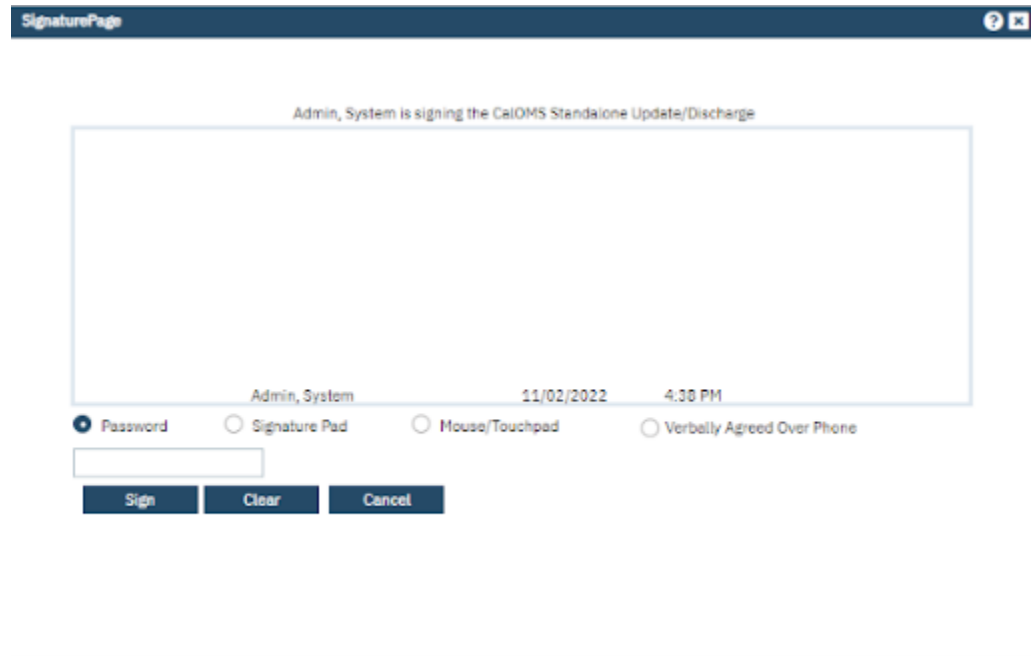

When you click the sign button, if you have fields that are required that you did not enter data into, you will receive a validation message like the one below.

The validation message will tell you exactly where you need to go to complete the requirement. The first part of the message (e.g. Update/Discharge) will tell you on what tab you will find the requirement on. The second part of the message (e.g. CalOMS Update/Discharge) will tell you which section to find the requirement in. The third part of the message (e.g Update/Discharge Transaction Type is required) will tell you what the requirement itself is.

Once all requirements have been completed, click the sign button again (if validations occurred). You will then be presented with the signature screen. By typing in your password and clicking 'Sign' the document will be signed and applicable information initialized to the client record.

Once the document is signed, you should see a PDF of the document on the screen and status should change to complete.

Set-Up Considerations (Administrative Purpose)

This section outlines all items needed for setting up this document for use with your organization, including any necessary configurations/details around how to set up other areas of your system that work directly with this document.

Configuration Keys

Field Name	Configuration Key Category Name
County of Submission	XSetCountyCodeForCaliforniaStateReporting

If your organization only provides services to clients within ONE county, then you should enter the County Code as defined by your state here. If nothing is entered, then on the form, user will be required to select the County every time. If something is entered here, then user will not see the field and it will prepopulate in the table for this document to be sent for reporting to the accurate county.

If your organization provides services to clients in more than one county and you report to each of those counties, then you should indicate 'None' in this key or leave it blank and users will be required to select the county each time they do the document.

If there are counties you do not provide services to, you can go to the DACSManagingEntity Global Code category in the Global Codes screen and deactivate any counties you do not want staff to see in the drop down. You should only do this for counties that NONE of your programs are serving. You should keep all counties that at least one program serves as active.
