Overview

The OSHPD data collection process begins at time of program enrollment. A user will create a Program Assignment for a OSHPD reportable program with a Program Status of enrolled. This may be done using the Program Details Screen or the Program tab in the Registration. Following the provision of services the client is discharged from the program using the SC Discharge Document or updating the Program Assignment Status to Discharged. At this point a user my complete the OSHP Discharge document to collect the remaining required data for the OSHPD submission file.

Reporting Process
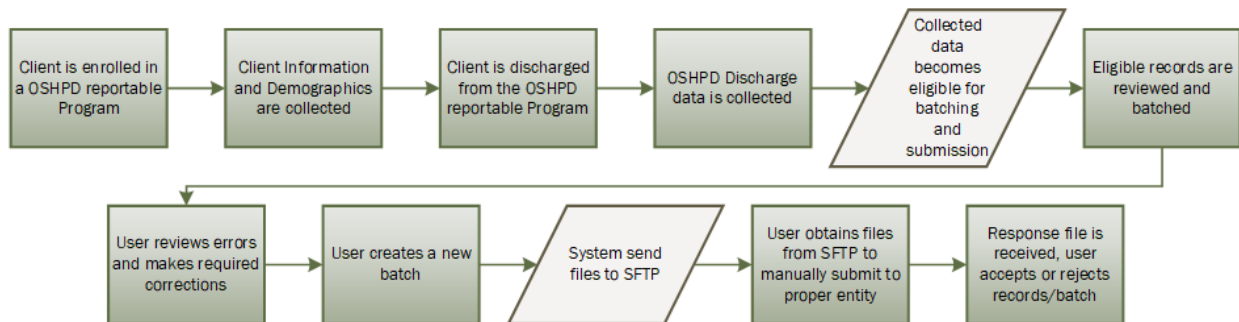

Reporting User Interface

Once the data has been collected and is eligible for submission the records are available to be reviewed via the OSHPD Reporting Summary List Page. There the user can review the available candidate records, errors the records may have and the field level data for each record.

Navigating to the OSHPD Reporting Summary List Page.
1. Search for the OSHPD Reporting Summary List Page. (My Office) using the Search icon. Click on the OSHPD Reporting Summary List Page in the typable drop down. This will open the OSHPD Reporting Summary List Page.
2. Alternatively, locate the OSHPD Reporting Summary List Page using the Quicklink if this has been configured in your environment.
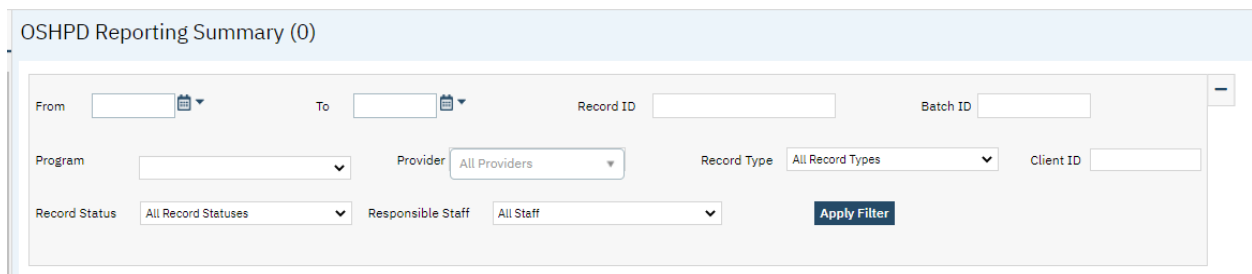

The OSHPD Reporting Summary List Page displays all eligible OSHPD submission records according to the following Status Types:

● In Progress = a record was created but not yet batched for reporting.

- Cancel = a record was created and batched for submission then later canceled. These records are no longer eligible for batching.
- Sent = the record was batched for submission and is awaiting response. These records are no longer eligible for batching.
- Accepted = A response file was received for the batch the record was included in and the record was marked as Accepted. These records are no longer eligible for batching.
- Reject = A response file was received for the batch the record was included in and the record was marked as Rejected. These records are no longer eligible for batching.

There are filters available in the OSHPD Reporting Summary List Page. These are as follows:
- Select a date range (From Date and To Date) for which data to be pulled for
- Record ID - this is the unique id assigned to the OSHPD record
- Batch ID - if a record has previously been batched, this field will filter on a specific Batch ID.
- Program - indicates which program the OSHPD record is associated with
- Provider - if the customer is a County entity and is utilizing MCO, this will indicate which Contracted Provider the OSHPD record is associated with
- Record Type - this will default to OSPHD
- Client ID - this is the unique SC identifier of the client record associated with the OSHPD record.
- Record Status - indicates the current status of the record.
- Responsible Staff - the staff who completed the data collection for the record will display

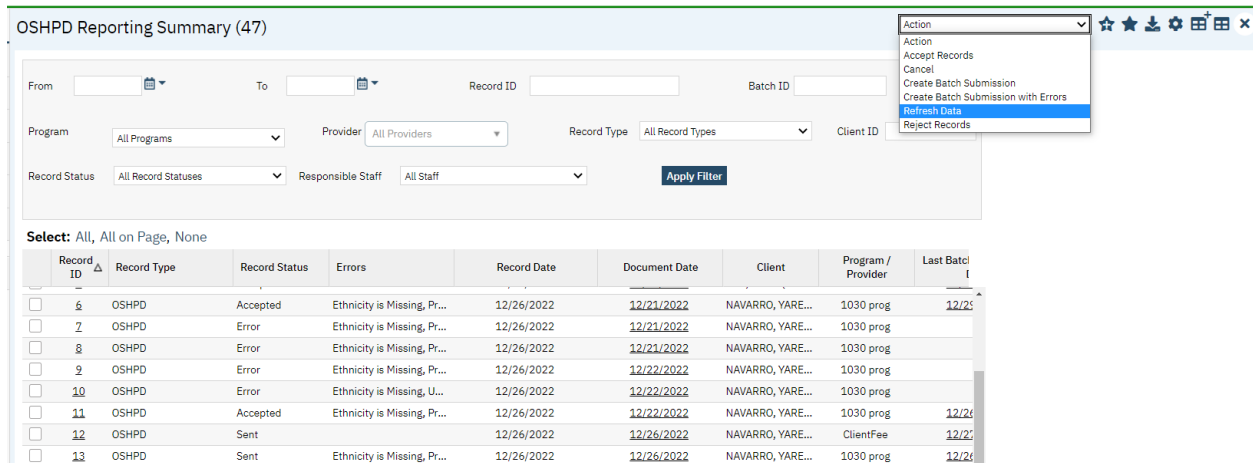

Monitoring Reporting Prior to Submission

To monitor records throughout the reporting period, prior to your submission deadline, you can complete the following steps:
1. Navigate to the OSHPD Reporting Summary List Page.
2. Review or filter for records in a status of In Progress and/or Error since the last batch creation date or the last review date.
3. For records with a status of Error, use the Record ID hyperlink to navigate to the OSHPD Record Detail Page to further review of error messages and record data.
4. Work error messages by navigating to the screen in which the source data resides.

5. Once data has been corrected, navigate back to the OSHPD Reporting Summary List page and use the check box to select the record(s) that have been corrected then select Refresh Data from the Action drop down to pull the corrected data into that record to later be batched for submission.

Repeat these steps as many times as needed in order to view errors, make corrections and confirm the errors are resolved.

Reporting Summary Widget

Another utility available for monitoring records throughout the reporting period is the OSHPD Reporting Summary Widget. From the Dashboard a user can review basic statistics of records within a specific day range and Program(s).

1. Navigate to My Office > Dashboard
2. Locate the OSHPD Reporting Summary Widget
3. Enter a number of past days for which to filter the records.
4. Select All or a specific Program using the drop down.
5. Click the refresh icon in the right hand corner of the widget if filters were modified.
6. Within the widget are hyperlinks that will direct the user to prefiltered list pages where they can review records, modify statuses or work errors as needed.

File Logic

The OSHPD records are reported within one field format. In order for a record to be eligible for submission the follow must occur:

1. The client must be enrolled in a Program with the proper setup and configuration detailed in the System Setup section of this guide.
2. The client must be discharged from the Program enrolled in step 1. This can be done using the SC Discharge Document or simply updating the Program Assignment Status to Discharged.
3. The client must have a completed OSHPD Discharge Document.

System Setup

In order to properly submit acceptable data the environment needs to be configured with allowable values and configurations.
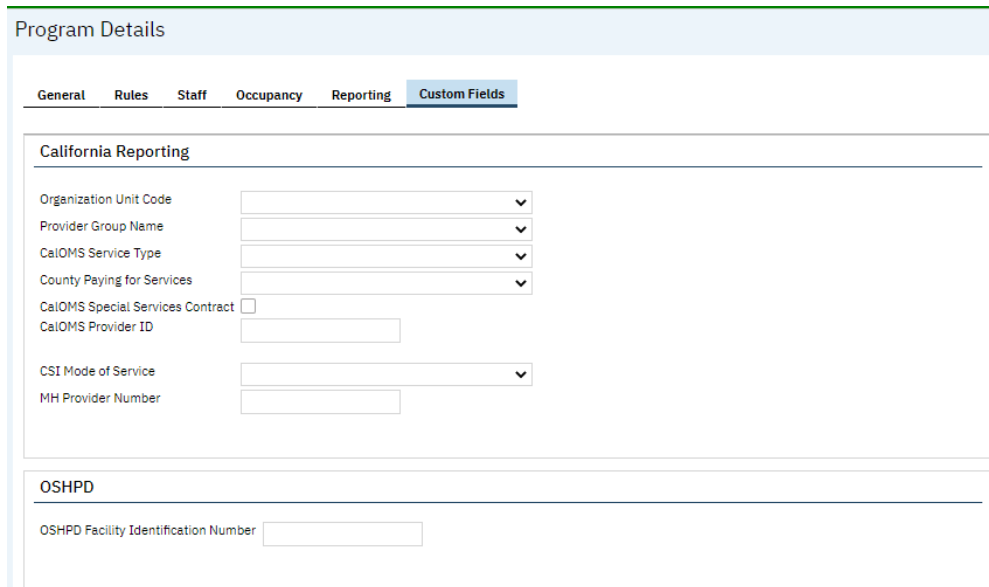

Global Codes

All of the Global Codes which need to be set up are in the Global Codes tab of the OSHPDFile Mapping spreadsheet. Please reference the File Mapping for details.

Programs

Program set up drives Program display logic within the OSHPD Document as well as the file submission. For a Program to be considered OSHPD reportable it must have an associated OSHPD Facility ID.

To set up the OSHPD Facility ID navigate to Administration > Programs, click the Program Name from the list to open the Program Details Navigate to the Custom Fields Tab to enter a 6 digit numeric value.

Procedure Code

The OSHPD Discharge Document collects Procedure information in the form of ICD 10 PCS codes. A custom table with the allowable code set drives the data in the procedure code search. This table is delivered to the environment and requires no configuration.
