EHR Release Notes: May 23, 2024

Completed Initiative	Release Note
My Office list page of MH Special Populations	This is a list page that shows all non-SUD special population records in SmartCare. This is not CDAG'd, as special populations is a client-level record. This list page is meant for supervisors to be able to filter by specific types of special populations. The date range will return any client record for which that special population was active during that date range.
My Office list page of SUD Special Populations	This is a list page that shows all SUD special population records in SmartCare. This is not CDAG'd, as special populations is a client-level record. This list page is meant for supervisors to be able to filter by specific types of special populations. The date range will return any client record for which that special population was active during that date range.
Bug: Confirm that QI STRTP Assessment RDL is in 12 point font, per style guide	Changed the font size of the STRTP QI Assessment to be 12 point font.
Datapalooza Modifications - Primarily in support of Billing	CalMHSA has updated some of the fields in Datapalooza (Program Metatagging) based on county feedback. This includes adding/removing options and renaming some of the fields to better clarify their use.
Label Changes in RX/Client Orders	This is to be more clear for the headers of the order sig within Rx/client orders specifically "Directions" to change to "Frequency" and "Dose" to "# of Units"
Fix "Other Denial of Patient Rights" order, Q1, "Letting Writing" should be "Letter Writing"	No Additional Release Notes
Add External Code 1 to Global Code 174400000X in Category "Staff Taxonomy"	No Additional Release Notes
Clean up ANSA functionality to match CANS functionality	When Streamline implemented their ANSA 3.0, we found that it had different functionality than the CANS. We had requests to make these two documents function similarly.
Justice Involved Reentry Initiative-Requirements for Medi-Cal Delivery Systems	This is tracking any needs related to the Justice Involved Re-Entry Initiative (BHIN 23-059).
Allow Delete on Flow Sheets	Permission change to allow Sys Admins and Clinical/Medical Supervisors to be able to delete flow sheets that were entered in error.
De-permission "Register Client" button on Inquiry Details Screen for all user roles	This is a button we don't use. We created a permission for this button and ensured it was denied to all users.
Update S&R Order: change Q2 wording and add Q7 and change "MXN Restraint" to "Mechanical" to match	Update question 2 from "Describe Preceding Behavior" to "Preceding Behavior and/or Justification of S&R". Add question 7 "Maximum Length of Seclusion and Restraint" to include maximum S&R time frames based on age group.

EHR Release Notes: May 23, 2024

Completed Initiative	Release Note
Update S&R Safety Check Flowsheet	Added "Involuntary Emergency Medications Given" in "Current Seclusion and Restraint Status" section, changed name of "Medication Given for the Purposes of S&R" into "Voluntary Medication Given" and added "Voluntary Medication Offered" in "Less Restrictive Interventions" section
Update Safety Check Order Names & remove duplicates	We had "Every 15 minute Safety Check" and "Q15 Safety Check" options, which are duplicates. We are renaming these to "Safety Check (Every 15m, Q15min)". Did for all versions of safety checks (15 min, 30 min, and 60 min).
Delete duplicate reports	No Additional Release Notes
Update Embedded Safety Check Whiteboard Popup	On the whiteboard when clicking on the next safety check, a pop up window opens. Most of these sections will push to the Safety Check Flow Sheet that CalMHSA has created.
