

## EHR Release Notes: June 13, 2024

Completed Initiative	Release Note
UI Screen for counties to enter MCP information	Created a screen where counties can edit what Managed Care Plans (MCPs) are included in their instance of SmartCare. These MCPs are used in the Transition of Care Tool, which is used to transfer clients from County MH (the MHP) to an MCP.
Mobile Crisis Progress Note: PDF showing incorrect age versus client's actual age. Age is a year off	A few counties have reported the 'Age' field in Mobile Crisis RDL headers are a bit off in edge cases - we have tweaked this logic, and ensured that this field should now be displaying appropriately in all cases.
Seclusion and Restraints Debrief	Create a seclusion and restraint debrief form
Safety Plan for Seclusion or Restraints	Create a Safety Plan for the prevention of S&R as part of inpatient (especially Super-PHF) workflow
