

EHR Release Notes: June 20, 2024

Completed Initiative	Release Note
BUG: Unable to close Timeliness MH Non-Psychiatric SMHS Timeliness Record - Validation error	Fixed a bug where the system wouldn't allow the closure date to be the same date as the date of first contact.
Create report/query for clients who were created in a time frame that don't have a TADT form - Program specific	This report is meant to be run by program managers to determine which new clients associated with their programs have never started a TADT document. This is recommended to be run at an administrative level in order to see all new clients across a county's system. However, we understand that some counties have less centralized access processes, so this report can also be run only for specific programs. In this case, new clients means an individual who recently received a Client ID in SmartCare.
Addition of Secondary Staff Id to County Environments	Created a new field in the Staff Details for a secondary Staff Id.
