EHR Release Notes: July 3, 2024

Completed Initiative	Release Note
Program Meta Tagging: Tweak Validation SP	Edge case reported where validation on Program Meta Tagging/Datapalooza was erroneously not firing - validation logic updated, validation now firing as expected.
Psych Note Template Version + informed med consent integration	This was released as a "Dark Feature", as no Procedure Code has yet to be assigned to this template. Psych Note Template which is customized for CalMHSA CA Counties: * Displays client information about allergies, vitals, problems, diagnoses, labs, and current medications * Has a Select ALL checkbox which dynamically renders the rest of the page * Initializes with the previous note that matches the same staff, client, program, and cdag * Allows to verbally consent to client medications
