

## Initiatives Report

Name	Public Description	Section/Column	Priority 1-10	Product Management Meeting - Status	Need Determination
Need ability to override Service Note Requirement for Contractors		Billing	1	Awaiting Streamline Design	
Update License-Specific Articles to match new procedure codes		Billing	1	Review In Progress of New Request	
Staff with Multiple Taxonomy Codes, or when a staff moves from one Taxonomy to another	Some staff/users may have more than one taxonomy code but only one taxonomy code field is present and is used for all claims. Counties need a way to select which taxonomy code goes on claims based on program and license/degree that's associated with the procedure code.	Billing	3	Awaiting Streamline Requirements Doc	Essential Modification - Functionality is not present
Zip Code Validation Improvements		Billing	4	Waiting Additional Details from Streamline	Industry Standard - Functionality requires workarounds
Validations on Client Information Screen to address billing requirements	This is related to billing errors and/or billing denials due to information not being present on the Client Information screen. This includes "Sex" being incomplete and/or not matching the Medi-Cal information, and "Address" not including the city, state, and zip code and/or these 3 fields not matching. CalMHSA is exploring with Streamline what is possible to address these concerns.	Billing	4	Waiting Additional Details from Streamline	Industry Standard - Functionality requires workarounds
CSU Maximum Hours & Billing	<p>This was received as an urgent request from a regarding how CSU services are billed. There is a maximum number of hours that can be claimed. Currently, the process is to enter the hours that will be claimed in the service, not the total hours the client was present., which can be found by looking at the program enrollment data. The county indicated that this program enrollment information is not enough for fiscal tracking, and they have been entering in the full number of hours the client was present in the CSU rather than only the hours they meant to claim. They indicated other counties are also doing it this way, despite the current CalMHSA guidance. Now, attempting to re-do the services manually in time to claim for services would be onerous to impossible.</p> <p>At CalMHSA's recommendation, they explored alternatives and have come up with a solution. CalMHSA will be reviewing this solution internally and bringing it to counties for review before implementing this.</p>	Billing	4	Waiting on Additional Details from County	
Advanced Billing for Medicare - was a request from a county - Khristy was going to send me the form so we could work on creating it in SmartCare?		Billing	6	Waiting on Initial Design by Product Management	
Make Documentation and Travel time fields required	This is a request from county directors. When direct service staff don't enter in travel and documentation time, management cannot determine if the current DHCS rates are accurate or need to be adjusted. The first step is to ensure that "0" can be entered in the time fields of a service.	Clinical Documentation	1		
2024 - Annual CMS ICD-10 Updates	Addressing the annual updates CMS makes to the ICD-10 code list.	Clinical Documentation	1		State Requirement

## Initiatives Report

Name	Public Description	Section/Column	Priority 1-10	Product Management Meeting - Status	Need Determination
<p>Diagnosis search does not match Problem List search &amp; blank description when no SNOMED code</p>	<p>The Problem List currently searches by SNOMED codes by default. Since California BH uses ICD-10 codes, we're asking Streamline to include the ICD-10 description as the primary description in the Problem List and to default the code search by ICD rather than SNOMED. This should also address the issues where the ICD-10 code does not have a corresponding SNOMED code. The SNOMED description will still be visible if desired, but the ICD-10 description will take center-stage. This is currently slated for October development.</p>	<p>Clinical Documentation</p>	<p>2</p>	<p>Awaiting Streamline Requirements Doc</p>	<p>Essential Modification - Functionality is not present</p>
<p>CDAG: Associate documents with a program enrollment period (episode) rather than just a program</p>	<p>This was originally reported as a bug. When creating a document in SmartCare, the CDAG window pops up and requires the user to select a program. The available options are limited based on what programs the client is associated with (requested, enrolled, or recently discharged from) and what programs the user is associated with. In this dropdown, the program list includes the dates of the program enrollment. However, when selecting a specific enrollment, SmartCare seemed to ignore the user's selection and instead selected the first instance of the client's enrollment in that program. This was especially troublesome for crisis and inpatient programs, which have clients open for a short time before discharging and tend to have clients be re-enrolled. CalMHSA requested that Streamline fix this so the document would be associated with that particular instance of the program. This way, when information is also initialized forward (e.g. the document pulls in the program enrollment date), the information is accurate. Streamline has made the fix and it is in the Feb MSP. However, there were a few unintended consequences. Scanned documents brought over during conversion are associated with a program, but there may not be an enrollment instance of that program in SmartCare, since this is legacy data. Even if there is a program enrollment, the enrollment dates may not include the effective date of the scanned document. CalMHSA is working with Streamline to figure out a solution to this issue. Update: Unforeseen consequences have been found post-implementation. CalMHSA is working with</p>	<p>Clinical Documentation</p>	<p>2</p>	<p>In Product Roadmap Development (SL)</p>	<p>Essential Modification - Functionality is not present</p>
<p>CDAG Users are able to edit a document from a program that they are not associated with but is within their CDAG</p>	<p>This was initially reported as a bug. Users must be associated with a CDAG, and may also be associated with programs in their user setup (Staff Details). CalMHSA has understood this to mean that the CDAG the user is associated with should determine what they can see in the system and the Programs the user is associated with should determine what they can write to. This is the case for new documents, as the CDAG pop-up dropdown will only allow a user to select a program that they are associated with and the client is enrolled in (or recently discharged from). However, for documents that already exist in the system, a user may see any documents from programs within their CDAG, even if they are not directly associated with that program. The document setup screen (Document Management) determines if the document is editable after signature. It is not impacted by CDAG, programs, etc. Because of this, a user can view a document associated with a program that is within their CDAG and click the Edit button while in that document. This allows that user to edit a document in a program they aren't associated with, essentially giving them a type of "write" access to documents outside of their associated programs. CalMHSA is working with Streamline to adjust the functionality to ensure that users who are not associated with a program cannot edit a document associated with that program.</p>	<p>Clinical Documentation</p>	<p>2</p>	<p>Development that needs to be scheduled (SL)</p>	<p>Essential Modification - Functionality is not present</p>

## Initiatives Report

Name	Public Description	Section/Column	Priority 1-10	Product Management Meeting - Status	Need Determination
Inquiry updates should NOT overwrite signed notes	<p>This was initially reported as a bug. When in the Inquiry screen, if the Crisis checkbox is checked, you can enter the start of service information. This is incredibly helpful in crisis situations. Once you save the Inquiry, the link to the associated service note becomes clickable. Clicking this link will take you to the associated service note. If the program or procedure code is then changed in the service note screen, this will create issues with the link between the Inquiry and the corresponding Service Note. When the program or procedure of the note was changed, and then the Inquiry was changed and saved, SmartCare soft-deleted the completed service note and re-created a new one based on the information in the crisis tab.</p> <p>CalMHSA is asking that Streamline address this issue, as we feel that no automatic features in SmartCare should delete a signed clinical document.</p> <p>Update: Slotted for Oct 2024 development</p>	Clinical Documentation	2	Awaiting Streamline Design	Essential Modification - Functionality is not present
Scanning Document Types	<p>When scanning or uploading a document into a client's record in SmartCare, you have to first select "Client (Medical Records)" and then choose the Record Type. This categorizes the type of scanned document being uploaded. There are limited record type options to choose from. Counties have requested that this be expanded to increase the specificity for tracking purposes.</p> <p>Note: This task is not related to the issue of having more than "Client (Medical Records)" as an option in the scanning screen (Upload File Detail).</p>	Clinical Documentation	2	Awaiting Prod Deployment (Tested in QA & Approved to Prod)	Optimization - Functionality is present but very clunky
Redoing PDFs (RDLs) across SmartCare	<p>In SmartCare, there are 2 pieces to every document: the data entry piece and the report (pdf) view. The latter is called the RDL. CalMHSA has created a style guide for RDLs which includes state required items, such as ensuring the font size is at least 12 point and adding a redisclosure statement at the bottom of documents from an SUD program. When CalMHSA creates a new document for SmartCare, this style guide is used when creating the RDL. However, there are many core documents used by CalMHSA, meaning documents created by Streamline that are not unique to CalMHSA's environments. CalMHSA is working to redo the RDLs for all of these documents, from the Release of Information to service notes.</p>	Clinical Documentation	3	In Product Roadmap Development (SL)	State Requirement
Problem List Re-Design	<p>This is about making sure the problem list shows the person who identified the problem and when, per BHIN 23-068. CalMHSA is discussing options with DHCS around this, as this makes care coordination between SUD and MH providers difficult and duplicative.</p> <p>This also addresses using SNOMED descriptions rather than ICD-10 code descriptions. We've had requests that the ICD-10 code description be used, as staff are trained on DSM/ICD rather than SNOMED.</p>	Clinical Documentation	3	LOE Received, Needs Review, Waiting on additional details from State	State Requirement

## Initiatives Report

Name	Public Description	Section/Column	Priority 1-10	Product Management Meeting - Status	Need Determination
ASAM Criteria, 4th Edition & 1/1/25 deadline	<p>UPDATE: Per BHIN 23-068, DHCS will require counties to start using either the "ASAM Criteria Assessment Interview Guide" that UCLA created or the "ASAM CONTINUUM" software. While CalMHSA had planned to use the UCLA ASAM Assessment, this was based on ASAM 3rd Edition criteria. The ASAM 4th Edition was released at the end of 2023. CalMHSA had asked what DHCS would be doing as far as the update to the ASAM criteria, specifically around the 1/1/25 deadline. We were told that DHCS would be working with UCLA to create an updated version of their "ASAM Criteria Assessment Interview Guide" that matched 4th edition criteria. We have been waiting on this updated document before uploading anything else into SmartCare.</p> <p>We've continued to reach out regularly to DHCS through the year and have received no updates on the progress of this 4th edition assessment. Now that the deadline is approaching, we've started to hear that DHCS will have to do more research on the impact of changing to ASAM 4th Edition, as it will impact much more than simply this assessment tool requirement. This means we are no longer expecting a 4th edition ASAM Assessment to be provided by DHCS before the 1/1/25 deadline. We have therefore made the decision to move the current UCLA "ASAM Criteria Assessment Interview Guide" into SmartCare so that all counties can be compliant with the 1/1/25 deadline.</p> <p>There has also been a request to add the problem list to the ASAM Assessment in SmartCare which</p>	Clinical Documentation	3	Waiting on additional details from State	State Requirement
Diagnosis Validation - ensure only valid diagnosis codes are used	<p>Every year, CMS reviews and edits the ICD-10. This means that one year, a code (e.g. F43.8) may be a valid code and the next year it's invalid (e.g. requires F43.89 or F43.87). During the previous change (10/1/23), CalMHSA had Streamline run a script to remove the invalid codes from the diagnosis search.</p> <p>However, when creating a diagnosis document, the system will pull forward the information from the previous diagnosis document associated with that program. This means that there are already diagnoses included on the document. Some of these diagnoses may not be valid anymore due to CMS's changes. There is nothing to inform the clinician upon signing that these codes are no longer valid.</p> <p>Since service notes pull information from the diagnosis document into the billing diagnosis tab, this means invalid ICD-10 codes are being included on a service. The nightly billing job sees this invalid ICD-10 code and throws an error, not allowing the service to create a charge.</p> <p>CalMHSA is requesting that a validation be added on the diagnosis document to ensure that all ICD-10 codes included on the diagnosis document are valid.</p>	Clinical Documentation	3	Waiting Additional Details from Streamline	Essential Modification - Functionality is not present
Closed Loop Referral - MCP rules that may impact MHP	<p>DHCS recently put out draft guidance to MCPs for Closed Loop Referral Implementation. CalMHSA is reviewing this, as we expect that guidance similar to this will be given to MHPs in the near future.</p>	Clinical Documentation	3		
All Counties: Problem List modifications disappearing on Groups and Service Notes	<p>This was initially reported as a bug. When adding a problem to the problem list via the service note, the problem start date defaults to the effect date of the document, rather than the date of the service. Since the document will only show problems that are active on the date of the service, this often means that the problem just added does not show on the document itself. We are requesting that the default start date of the problem to be the service date, so that all problems added will remain visible.</p>	Clinical Documentation	5	Development that needs to be scheduled (SL)	Optimization - Functionality is present but very clunky
Improve group process functionality	<p>We've received a lot of feedback about the group functionality in SmartCare. The current functioning has required a lot of training to avoid errors. We have received many requests to improve this functionality to address these issues.</p>	Clinical Documentation	5	Waiting on Initial Design by Product Management	Optimization - Functionality is present but very clunky

## Initiatives Report

Name	Public Description	Section/Column	Priority 1-10	Product Management Meeting - Status	Need Determination
BHIN 24-005: Mobile NTP	<p>CalMHSA is exploring what is required in order to implement the Mobile NTP initiative.</p> <p>UPDATE: CalMHSA expects that this initiative will mean the creation of a Mobile NTP program. No other EHR-related items seem necessary at this time. The protocol for this item can be found here: <a href="https://2023.calmhsa.org/bhin-24-005-mobile-narcotic-treatment-programs/">https://2023.calmhsa.org/bhin-24-005-mobile-narcotic-treatment-programs/</a></p>	Clinical Documentation	5	Waiting on Initial Design by Product Management	State Requirement
Tracking Documentation and Travel Time	<p>Pre-CalAIM, services were claimed based on the minutes it took to complete the service. This claim included service time, travel time, and documentation time. CalAIM Payment Reform changed this to pay for services based on encounters. The rates for encounters are supposed to include the expected travel and documentation time.</p> <p>The only way to ensure fiscal solvency is to be able to track all time spent on services to ensure a county's rates are accurate. County directors are requesting that the travel and documentation time fields are completed to allow them to track rate accuracy, which would allow them to lobby the state if a rate adjustment is needed.</p> <p>CalMHSA is exploring methods to increase data entry into these fields, including the option of making these fields required, or conditionally required.</p> <p>UPDATE: CalMHSA is planning to make the Documentation Time and Travel Time fields required, but allow 0 (zero) to be entered. We're hoping this can be not-required for non-billable services.</p>	Clinical Documentation	5	Waiting on LOE	Industry Standard - Functionality requires workarounds
Mobile Crisis Enhancements	<p>UPDATE 10/11/24: reporting for Mobile Crisis has been separated into its own tracking item. This item is not solely for enhancements to the Mobile Crisis process. Current enhancement requests include a method of tracking to ensure transportation claims are present, creating a widget or some method of ensuring follow-up actions are taken, and ensuring there are not 2 encounters billed at the same time.</p>	Clinical Documentation	5	Parking Lot	Optimization - Functionality is present but very clunky
Crisis-Type Procedure Code - should not have to be limited to DFA-notes only	<p>In order to utilize the Crisis tab in the Inquiry screen, the procedure codes must be marked as a crisis type of procedure code. This procedure code's associated note must be a specific type of document called a "DFA". This means that the progress note, which Streamline created for CalMHSA, and the psych note, which CalMHSA is creating in another method, cannot be associated with a crisis-type procedure code. This has caused CalMHSA to duplicate the crisis intervention procedure code into "Crisis Inquiry" and re-create a simple narrative note in DFA in order to use the Crisis tab functionality for crisis intervention services. CalMHSA is asking Streamline to expand the functionality of this tab to be able to use any progress note type document in SmartCare.</p>	Clinical Documentation	7	Awaiting Streamline Design , Parking Lot	Optimization - Functionality is present but very clunky
Evaluate best practice for Problem List and Diagnosis Integration	<p>CalMHSA is exploring ways to address the duplicity of having a diagnosis document and a living problem list. We've had many requests for there to be some sort of exchange between these two items. There has even been requests to remove the need for the diagnosis document. CalMHSA is exploring these options both with Streamline and DHCS.</p>	Clinical Documentation	8	Waiting on additional details from State	State Requirement

## Initiatives Report

Name	Public Description	Section/Column	Priority 1-10	Product Management Meeting - Status	Need Determination
Automatically map CANS and ANSA questions answered 2 or 3 to the Problem List (Sonoma County Request)	<p>A county has requested that we develop a way to automatically push items marked as 2 or 3 on the CANS or ANSA to the problem list (Client Clinical Problems). They have provided a suggested crosswalk for ICD-10 codes they feel would match the CANS/ANSA item.</p> <p>Some additional concerns that would need to be addressed in order to move this forward include how to deal with duplicate ICD-10 codes, what to do when the ICD-10 code is already on the problem list, should problems be marked as resolved when the CANS/ANSA moves to a 0 or 1 score, and would the problem's program change based on the most current CANS/ANSA completed.</p> <p>This is considered an item that would be nice to have, but is not critical. There is also some work going on at the State regarding the CANS which may impact this request. As these potential changes roll out, this request will be reconsidered.</p>	Clinical Documentation	10	Parking Lot	Enhancement - Would be nice to have
Clean up ANSA functionality to match CANS functionality	When Streamline implemented their ANSA 3.0, we found that it had different functionality than the CANS. We had requests to make these two documents function similarly.	Clinical Documentation	10	Abandoned/Withdrawn	Enhancement - Would be nice to have
Service Note: Interpreter Services: Make Interpreter Agency a Dropdown	<p>In a service note, you can designate when a service is provided in a language other than English. You can also designate if an interpreter was needed and what agency provided the service. The field where you enter the name of the interpreter agency is a free-text field, meaning you can enter anything you'd like. This enhancement would make this a drop-down field, where counties could enter in their contracted interpreter agencies in order to better track which agencies are being used and at what frequency. This could also help with Language Line utilization tracking, as Language Line would be an available option in the drop-down menu.</p>	Clinical Documentation	10	Parking Lot	Enhancement - Would be nice to have
Mobile Crisis Regular DHCS reporting requirements	We have heard that DHCS is working on the final requirements for the Mobile Crisis reporting. This task will track all things related to the DHCS mobile crisis report requirements.	Compliance/State Reporting	1	Waiting on additional details from State	State Requirement
BHIN 24-030: CalOMS Treatment Demographic Reporting	CalMHSA is working with Streamline to make the necessary changes to the CalOMS reporting fields, as described in BHIN 24-030.	Compliance/State Reporting	1		State Requirement
CARE Act: CARE Plan/Agreement Document	This is a document that will be used in CARE Act programs to document what services are on the client's CARE Plan or CARE Agreement. This will be used to initialize information into monthly reporting documents.	Compliance/State Reporting	1	In Product Roadmap Development (SL)	State Requirement
CARE Act: Reporting Document (UI for staff to complete)	This document will be similar to other state reporting documents. It's a document where all state reporting requirements for the CARE Act will be entered by staff on a monthly basis.	Compliance/State Reporting	1	In Product Roadmap Development (SL)	State Requirement
CARE Act: Reporting Process	This is the process of creating the report that will be submitted to the State as part of state reporting. This will utilize the CARE Act Reporting Document as a basis of gathering data, but this task is about processing this data into something reportable.	Compliance/State Reporting	1	Waiting Additional Details from Streamline	State Requirement
BQuIP & ASAM LoC reporting	<p>CalMHSA is exploring whether the BQuIP must be reported as part of the monthly ASAM Level of Care report, as it's generally considered an ASAM Screener, but is not currently being included in the ASAM LOC report.</p> <p>Update: CalMHSA has received confirmation from DHCS that the BQuIP should be reported on the ASAM LoC report. CalMHSA will work on a method for including this.</p>	Compliance/State Reporting	1		State Requirement

## Initiatives Report

Name	Public Description	Section/Column	Priority 1-10	Product Management Meeting - Status	Need Determination
Legal Status: BHIN 23-067, 24-011, & 24-013 LPS Quarterly Data Collection	Counties have a requirement to track LPS data across the county. Since some counties have an LPS facility, CalMHSA is working on a way to easily pull their LPS data for reporting. The county has to provide data to the state from ALL LPS facilities in the county. This task is not meant to add in all LPS data from all LPS sites in the county, but merely to make data reporting from county owned and operated LPS facilities easy to obtain.	Compliance/State Reporting	1	In Product Roadmap Development (SL), Post-Prod Review Needed	State Requirement
How to track SUD Urgent requests	EQRO has a requirement to track urgent requests for SUD services. This is not currently on the TADT, but may be in the future. CalMHSA is working with the State to determine how this should be tracked and reported on.	Compliance/State Reporting	1	Waiting on additional details from State	State Requirement
CARE Act Implementation	This task is tracking all items related to CARE Act implementation. This includes any required documents, reporting, and tracking. UPDATE: This task has been separated out into its component parts. This task is marked complete but the other tasks will be tracked separately.	Compliance/State Reporting	2	In Product Roadmap Development (SL)	State Requirement
EQRO: Penetration Rates Report	CalMHSA is working to create a penetration rates report that can be used during EQRO.	Compliance/State Reporting	2	Review In Progress of New Request	Industry Standard - Functionality requires workarounds
CARE Act: Additional development not related to state requirements	CalMHSA is working with CARE Act Phase 1 counties to determine what additional needs exist to best implement the CARE Act. This includes things like how to best produce reports to the court, how to track court dates, and how to track people involved with a client's CARE Act case.	Compliance/State Reporting	2		Essential Modification - Functionality is not present
CARE Act: Add radio button for "CARE Plan" v. "CARE Agreement"	The CARE Plan/Agreement document is used for both a CARE Plan and CARE Agreement, as the document itself is not different. The only difference is whether the client agrees to the plan (CARE Agreement) or if the court orders the plan because the client did not agree (CARE Plan). A phase 1 county indicated that documenting the difference will be important, so we've asked to add a method of designating whether this document is an Agreement or a Plan.	Compliance/State Reporting	2		Essential Modification - Functionality is not present
CARE Act: CARE Episode entry separated from CARE Act Reporting		Compliance/State Reporting	2		Industry Standard - Functionality requires workarounds
How to address when a clinician leaves without finishing their service notes	CalMHSA is working on training articles and protocols on addressing off-boarding staff. We've had counties have staff leave who have not finished	Compliance/State Reporting	3	Needs Discussion with CalMHSA Product Team	Optimization - Functionality is present but very clunky
Denial of Rights Monthly Report	LPS facilities must report monthly on any incidents of denying a patient's rights. CalMHSA is working to create this report from data in SmartCare.	Compliance/State Reporting	3	In Product Roadmap Development (SL)	State Requirement
Program Meta Tagging Feedback	This is the task where we're reviewing feedback from counties regarding Program Meta Tagging (Datapalooza) and adjusting as necessary.	Compliance/State Reporting	3	Review In Progress of New Request	Enhancement - Would be nice to have
Quality Assurance Timeliness Tracking Report	CalMHSA recently deployed a TADT report, which is meant to be used to complete the TADT form that DHCS provides as part of the Network Adequacy Certification process. Counties need a more usable timeliness tracking report that can be behind CDAG rules and provide more clear information. This has been delivered (see release notes)	Compliance/State Reporting	3	In Product Roadmap Development (SL)	Essential Modification - Functionality is not present

## Initiatives Report

Name	Public Description	Section/Column	Priority 1-10	Product Management Meeting - Status	Need Determination
TADT Updates	UPDATE: CalMHSA held a county shared decision-making meeting about this on 9/25/24. The required changes have already been deployed to production systems (any fields that were missing from the current documents). No further changes will be developed until counties provide feedback. Feedback can be given by emailing EHR@calmhsa.org.	Compliance/State Reporting	3		
Be able to upload state reports (CANS, PSC, CSI, 1st Psych Appt, etc.) in bulk from contractors	Counties have requested that state reporting items be able to be uploaded to SmartCare in bulk. This way they can quickly upload contractor information and report out from SmartCare in one batch.	Compliance/State Reporting	5		Industry Standard - Functionality requires workarounds
County Health report	CalMHSA is working on a set of reports to determine the health of the EHR. This includes determining if programs are setup correctly, how many programs have 0 clients associated, are people billing, how many people logged in within the last 30 days, etc. This should give system administrators some guidance on additional trainings to provide to staff, ways to improve their EHR setup, etc.	Compliance/State Reporting	5	Waiting on Initial Design by Product Management	Optimization - Functionality is present but very clunky
Contingency Management Data Reporting	DHCS posted a draft of the quarterly reporting requirements. CalMHSA held a county shared decision making meeting about these requirements on Monday, 7/9/24. A protocol was created based on county input and can be found here: <a href="https://2023.calmhsa.org/contingency-management-recovery-incentives-programs-quarterly-progress-report/">https://2023.calmhsa.org/contingency-management-recovery-incentives-programs-quarterly-progress-report/</a> CalMHSA may work on reports that can be used for some of these items, but counties indicated that they are capable of filling out this report by themselves at this time, so this is lower priority.	Compliance/State Reporting	5		State Requirement
Level of Care Congruency report	Request for a report between ASAM Level of Care between brief screening (BQuIP) and the actual ASAM LoC assessment	Compliance/State Reporting	7		
CalOMS - Add refresh button to re-initialize the information that initializes from the Client Information screen	When creating a new CalOMS document, some client information gets pulled in from the Client Information screen. However, when the user goes to this screen to correct information, the CalOMS document doesn't re-pull this information forward. CalMHSA is requesting a method to refresh the data on the CalOMS document from any data pulled in from the Client Information screen. CalMHSA is re-reviewing this methodology and is scheduling a County Shared Decision Making Meeting for this topic.	Compliance/State Reporting	9	LOE Received, Needs Review	Optimization - Functionality is present but very clunky
Any Role assigned to complete a task in Order setup ( eg. Acknowledge/Acknowledge Required) need to be visible/accessible for end user		Inpatient	2	Requirements Approved	
Safety Plan for Seclusion or Restraints - pending client programID fix		Inpatient	2	Development that needs to be scheduled (SL)	

## Initiatives Report

Name	Public Description	Section/Column	Priority 1-10	Product Management Meeting - Status	Need Determination
1-Hour Face-to-Face Assessment- pending client programID fix and post PROD fix roles		Inpatient	2	Bugs Found in Post-Prod Review; Working on Bugs	
Seclusion and Restraints Debrief- pending client programID fix	Create a seclusion and restraint debrief form	Inpatient	2	Deployed to Prod and Completed	
Need newly created permissions for the 'inpatient activity details' screen copied from train to prod		Inpatient	3		Essential Modification - Functionality is not present
Pyxis/Omniceil Dispensing Systems primary task	This is about creating a workflow for counties that have a Pyxis and Omnicell system	Inpatient	4	Waiting Additional Details from Streamline	
Acknowledge Require/Acknowledge/Signature Orders		Inpatient	5	Needs Discussion with CalMHSA Product Team	
IP Nursing Assessment and Workflow	This is to improve the nursing workflow for IP/CSU setting	Inpatient	8	Education/Articles Needed	
Can we have dual authors for specific documents?	Can we have dual authors for specific documents?	Inpatient	10	Parking Lot	
Walk Me - add info 'i's' to key IP setup fields so that the manual is embedded in the forms		Inpatient	10		
Interoperability - How to add new language global code to UCSDI & CCDA processes	Working to finalize the data mapping for Language for CCDA. Update: CalMHSA has made changes to the existing global code for mapping for CCDA. If counties need additional languages added, please request them using the enhancement request process.	Interoperability	4		State Requirement
Ability to add legal entities, certified sites, and contract contacts in for Org Providers		Managed Care	8	Needs Discussion with CalMHSA Product Team	Enhancement - Would be nice to have

## Initiatives Report

Name	Public Description	Section/Column	Priority 1-10	Product Management Meeting - Status	Need Determination
CURES/AIMS Checks (V6) to Client Medical-Related Facesheet from Psych Note V1.5		Medical	1	Awaiting QA Deployment	
Psych/Medical Note Template + associated Workflows	A new note template focused on prescribers, nurses and medical staff's documentation, along with workflow	Medical	1	Bugs Found in QA Review; Working on Bugs	
Adhoc Client Orders		Medical	2	Needs Discussion with CalMHSA Product Team	
"Comments" section from Rx/ Client Orders to MAR		Medical	2	In Product Roadmap Development (SL)	
Order Template Frequency Clean Up	We found discrepancies in order template frequency for lab orders. We are standardizing the order template.	Medical	2	Waiting Additional Details from Streamline	Industry Standard - Functionality requires workarounds
Client Orders Discontinue at end of Program, Expired and/or 1x use		Medical	3	Awaiting Prod Deployment (Tested in QA & Approved to Prod)	
Lab Vendor for smaller counties vs manual entry into flowsheets		Medical	3	Waiting Additional Details from Streamline	
Lab Orders/Labs Results are missing programs	Missing programs from labs	Medical	3	Awaiting QA Deployment	
Client Orders: Discontinue medication, losing the text or updated text in "comments" and instruction text	This is a bug where a medication is discontinued in client orders, users are losing their instructions text and comments	Medical	3	Awaiting Prod Deployment (Tested in QA & Approved to Prod)	
Functional Keyphrases (not a blocker for psych note)	This is the ability to create keyphrases are can pull in distinct data either client or author specific.	Medical	3	Education/Articles Needed, Bugs Found in Post-Prod Review; Working on Bugs	
MAT Medication/NDC Billing Phase 2		Medical	4	Requirements Approved	
User Cannot Determine Parent Order ID when needing to modify recurring orders	This is to give more clarity to ensure that if modify/ discontinuing a recurring order that they select the "parent" order	Medical	4	Deployed to Prod and Completed, Education/Articles Needed	Essential Modification - Functionality is not present

## Initiatives Report

Streamline build: notification to end user that labs did not go through?	This is to create a notification system to end user when there is a lab error.	Medical	4	Awaiting Streamline Design	
Last seen/Missed appts for Office View		Medical	5	Waiting on Initial Design by Product Management	
add "Days of Week" to orders sig and MAR	<p>Issue: Currently Days of the Week which is required field if MAR program and &gt; 24 hr frequency only shows up on the pdf. However, it should be part of the order/med sig then that is visible. It should show up on the MAR fields and even within Client Order itself /or Med Rx so that providers don't have to go the PDF (which is usually just for documentation not actually what people look at day to day) to find this information. It would be much easier and consistent to have this available from a UX standpoint right in front.</p> <p>Rationale: The expectation that providers would wait until it shows up on the MAR is an assumption esp if you need to change the order. This should be part of the clean up to make the system consistent. Any changes to the ordering system should reflect across all screens.</p>	Medical	5	Awaiting Streamline Requirements Doc	
Issues with SL widget with voided medication	This is an issue where the medication widget in SL is showing voided medications	Medical	5	Deployed to Prod and Completed	
Change Request: Please add a validation message on Quick Orders to indicate the Diagnosis is required before Send to Lab is clicked and confirmed.		Medical	5	Post-Prod Review Needed	
Need Ability to override Max Dose in 24 Hours	This improves on Streamline's Max Dose Quantity Allowed in 24 hours which is currently free text, and make it functional in helping end users to be aware that they me over the recommended maximum dose.	Medical	6	Awaiting Streamline Design	
Client Orders: Alert when there are duplicative orders of the same drug	<p>Issue: Currently, there is no safeguard with a warning to the user that there exist a previous order with the same drug. Need a warning to pop up in Client Order screen when prescribing the same medication that is already being prescribed with overlapping dates. Allow user to continue, but warning should be a pop up where acknowledgement is required.</p> <p>Rationale: Avoid having duplicate medications on the list because it can lead to confusion and potential for the patient to be given the same medication twice</p>	Medical	6	Development that needs to be scheduled (SL)	
Change Administration Time options in client MAR to be based on actual order time vs. Order Template Frequency time	Change Administration Time options in client MAR to be based on actual order time vs. Order Template Frequency time	Medical	7	Awaiting Streamline Design	
Psychiatric Advance Directive (Under Construction)		Medical	8	Development that needs to be scheduled (SL)	

## Initiatives Report

Name	Public Description	Section/Column	Priority 1-10	Product Management Meeting - Status	Need Determination
Medication Min/Max Recommendations not consistent	Initially there was an issue with specifically the min/max ranges for Geodon were inaccurate in comparison to FDA guidelines. This particular medication was fixed. However, while testing the fix for this, we tested other medications and found that sometimes there is a phrase such as "Pediatric Recommended Dosage Ranges Not Available For This Medication" and sometimes "Min 0 mg/kg/day - Max 0 mg/kg/day".  We'd like for this language to be consistent. If a medication is not recommended, we feel it would make more sense to say "This medication is NOT recommended for patients under the age of X" or "This medication is NOT recommended for patients under X kg" or something.  We are looking for SL to create consistency	Medical	9	Awaiting Streamline Design	Optimization - Functionality is present but very clunky
Process and Governance around Zendesk tickets		OKR's	1	Needs Discussion with CalMHSA Product Team	
Update Standard ROI	CalMHSA has received feedback from counties regarding the current Release of Information document in SmartCare. CalMHSA worked with 3 representatives of a group of 13 county counsels with regards to requested changes. Since this is a core document, meaning it's used by all SmartCare customers, there are limited changes that can be made. CalMHSA was also not able to create our own, separate version of the ROI without losing all of the integrated functionality. Further changes, if needed, can be reviewed in the future.	Patient Administration	1	In Product Roadmap Development (SL)	Optimization - Functionality is present but very clunky
Coordinated Care Consent Updates	CalMHSA has received feedback from counties regarding the current Coordinated Care Consent document in SmartCare. CalMHSA worked with 3 representatives of a group of 13 county counsels with regards to requested changes. This update includes making some items customizable by counties.	Patient Administration	1	Awaiting QA Deployment	Optimization - Functionality is present but very clunky
Separate ICC and IHBS in Specialty Populations		Patient Administration	1	In Product Roadmap Development (SL)	State Requirement
"End Consent" and "Revoke Consent" functionality does not carry over to Consent Document's .pdf	Initially reported as a bug. When a consent is revoked, the consent document itself is not updated. The only way to see a consent is revoked is to go the Consents list page. CalMHSA has requested that the consent document itself be updated (e.g. new version) to clearly show that the consent has been revoked.	Patient Administration	1	Development that needs to be scheduled (SL)	Essential Modification - Functionality is not present
Add "Program" as a filter to Disclosure "Add Documents" Pop Up	Adding a program column and filter to the "add documents" pop up page in the Disclosure Requests Details screen.	Patient Administration	1		Essential Modification - Functionality is not present
Add "Program" as a filter to Disclosure List Page	Adding a program column and filter to the Disclosure Requests list page	Patient Administration	1		Essential Modification - Functionality is not present
Patient Portal: Documents completed through Patient Portal need to be associated with a program	Clients can create documents in SmartCare. However, the CDAG window isn't popping up to allow them to associate that document with a program. This means that the client can't sign or save the document, since a program is required for every document when CDAG is turned on.	Patient Administration	2	Awaiting Streamline Design , Waiting on LOE	BUG
Care Coordination	This is a large project to attempt to track the transitions a client makes through services. While EHRs are good at tracking services and documents in a program, the transition from one program to another, whether by referral or transfer, is far more difficult to capture. Update: CalMHSA is currently working with 5 counties to conduct additional testing. There are also still bugs that need to be addressed before full implementation.	Patient Administration	2	Bugs Found in Post-Prod Review; Working on Bugs	Essential Modification - Functionality is not present

## Initiatives Report

Name	Public Description	Section/Column	Priority 1-10	Product Management Meeting - Status	Need Determination
Service Authorization Request and Review Process	Some behavioral health services require prior or concurrent authorization. This process includes the request for authorization, as well as the review process. This process also ties in with billing, as some services may not be billed without an authorization. This process is also related to the Care Coordination process, as receiving an authorization generally means a client is being referred to another program. CalMHSA deployed a stop-gap measure, called Authorization Tracking, so that counties could manually track authorizations, though it does not currently impact the billing process.	Patient Administration	2	Testing in QA	State Requirement
BHIN 23-059: Justice Involved Reentry Initiative-Requirements for Medical Delivery Systems	This is tracking any needs related to the Justice Involved Re-Entry Initiative (BHIN 23-059). No new development was required. See protocol here: <a href="https://2023.calmhsa.org/bhin-23-059-justice-involved-reentry-initiative/">https://2023.calmhsa.org/bhin-23-059-justice-involved-reentry-initiative/</a>	Patient Administration	2	Deployed to Prod and Completed	State Requirement
Core ROI is NOT behind CDAG even though CDAG pop-up occurs when creating the document	When creating an ROI (core form), the CDAG popup happens and a program is selected. However, when in the Client Information: Release of Information Log, ALL ROIs can be seen, regardless of CDAG that the person is logged in under. Being able to see the author of a document may result in a breach of information (e.g. the author is a known SUD Counselor, thereby showing that the client is receiving SUD services), hence the need for CDAG.	Patient Administration	2	Awaiting Prod Deployment (Tested in QA & Approved to Prod)	Essential Modification - Functionality is not present
Inquiry Overwriting Client Information when inappropriate	The Inquiry Details screen pushes information back to the Client Information screen. This makes sense in the regular workflow of 1. document an inquiry; 2. enroll client and complete client information. However, counties are finding that some staff are going back into inquiries and making a change, then saving them (e.g. changing them from "in progress" to "complete"). This "Save" pushes the information back to the Client Information. In some cases, information that was not present at the time of inquiry (e.g. language, gender identity) has been completed later in the client information screen. When this inquiry save occurs, the system pushes the blank field from the inquiry screen to the client information screen, overwriting the data that was entered. This is because the inquiry is not re-initializing the information from the client information screen every time it's opened.  CalMHSA does not want to stop the inquiry from pushing data to the client information, but is working on a method to determine how to best address this issue.	Patient Administration	3		Industry Standard - Functionality requires workarounds
Need a way to designate Primary Phone Number in Client Information	Originally reported as a bug. Currently, there isn't a way in SmartCare to designate the client's primary phone number. There's a method of indicating the client's preferred communication method, and if the client's preferred method is "telephone" the preferred phone number can be selected. However, for certain documents, such as the Transition of Care Tool, client information is pulled in from the Client Information screen. Many of these require the client's phone number. Without the end user being able to select the primary phone number, the system has no way to determine what to pull in. Currently, it pulls in the first phone number entered.	Patient Administration	3	Awaiting Streamline Design	Essential Modification - Functionality is not present
Reviewer Process	This is the process in which documents must first be reviewed by a supervisor before being marked complete in the system. This includes the Resident/Attending process. This also includes a service not billing until the Reviewer has signed.	Patient Administration	3	LOE Received, Needs Review, Need County Shared Decision Making Meeting	Industry Standard - Functionality requires workarounds
VIP Client Sequestering	Currently, to sequester a VIP client from all except a few users, a county must reach out to CalMHSA, who has to run a script on the back-end of the system. CalMHSA has requested that there be a front-end method of doing this.	Patient Administration	3	In Product Roadmap Development (SL)	Essential Modification - Functionality is not present
Standardize Client Information demographics fields and global codes	CalMHSA is looking into the demographics fields in the Client Information screen. This includes what fields should be utilized and what the global code values should be in each field. This is related to UCSDI and interoperability, as well as the requests we've been getting from counties to make changes to these fields. We will be working on a standardized set of fields and global codes.	Patient Administration	3		Optimization - Functionality is present but very clunky

## Initiatives Report

Name	Public Description	Section/Column	Priority 1-10	Product Management Meeting - Status	Need Determination
Client Programs Widget	A Client Dashboard widget that shows what programs the client is enrolled in. This will match a lot of what shows on the Client Programs list page. We are also working on having filters in the widget itself.	Patient Administration	4		Optimization - Functionality is present but very clunky
Special Population Improvements	CalMHSA is working to improve the usability of Special Populations through the use of "My Office" level list pages and a client-based widget. The new list pages would show all clients in SmartCare with a Special Population and filters would include the type of special population. A use case for this would be to quickly see all current clients with the special population "ICC/IHBS". The client dashboard widget would show what special populations a client currently has and would link to the special populations list page to make quick edits.	Patient Administration	4	Review In Progress of New Request	Optimization - Functionality is present but very clunky
Multi-language functionality	Counties have a requirement to provide documents in a client's preferred language. Counties have therefore requested some commonly-used documents to be translated into commonly-used languages. Some counties have staff whose primary language is not English and have been hired specifically to work with clients who share their preferred language. They would prefer to write documents in this preferred language in SmartCare. Since clients access SmartCare when they're accessing the Patient Portal, SmartCare should be available in their preferred language. This includes not just certain documents but the names of the documents, the field labels, the filters, etc.	Patient Administration	4	Need County Shared Decision Making Meeting	Essential Modification - Functionality is not present
Court Date Tracking	UPDATE 10/11/24: CARE Act court activity tracking is being handled as part of the CARE Act development process. This is because of the specific hearing types associated with the CARE Act process. This will serve as beta testing for non-CARE Act court tracking design and development.	Patient Administration	4	Need County Shared Decision Making Meeting	Essential Modification - Functionality is not present
Coordinated Care Consent change default expiration to 1 year	This is to address the new requirement that consents must, by default, expire in 1 year.	Patient Administration	5		State Requirement
Tracking Grievances, Appeals, and other MCPAR items	CalMHSA is exploring the option to track grievances and appeals (and other MCPAR items) in SmartCare. While this is a state requirement, it's unclear if it's wise to track these types of items in the EHR.	Patient Administration	5	Waiting on Initial Design by Product Management, Parking Lot	State Requirement
NOABD Improvements	Currently, NOABDs exist in SmartCare as letter templates. This is somewhat clunky, as the user has to replace certain sections of the letter template with their own, individualized words. Users also have the option to edit the language of the letter before sending, which can result in them changing the letter template language, which is required by DHCS. CalMHSA is working to create a data-entry screen where a user can instead select what type of NOABD they're sending and then only fill out the sections they need to customize. This would then create the appropriate NOABD document which would include all necessary language. There's also the consideration of automatically including the required attachments in the SmartCare document. Currently, these would simply be added when mailing the letter itself, but counties have requested that these attachments be included in the SmartCare document. CalMHSA is considering this option.	Patient Administration	5	Development that needs to be scheduled (SL)	Optimization - Functionality is present but very clunky
Streamline Core ROI changes		Patient Administration	5		
Patient Portal Implementation (part 1)	Meaningful Use requires counties to have a Patient Portal. While SmartCare has Patient Portal, this task is the effort to fully configure it for full implementation.	Patient Administration	6	Waiting on Initial Design by Product Management, Need County Shared Decision Making Meeting	State Requirement

## Initiatives Report

Name	Public Description	Section/Column	Priority 1-10	Product Management Meeting - Status	Need Determination
Treatment Team and Caseload Revamp	This task is about exploring improvements or reworking the treatment team and caseload system. For example, family members can be added to a client's treatment team, but should not require a program, as they would be a client-level treatment team member. Other non-staff members, such as a Drug Court attorney should include a program, so as not to share the information that the client is involved in Drug Court. Also, when a staff member works in multiple programs with a single client, they may be added multiple times to the treatment team. When a client is discharged from a program, all treatment team members associated with that program should be removed from the treatment team, unless they are also present under another program.	Patient Administration	7	Parking Lot	Optimization - Functionality is present but very clunky
Change "Verbally Agreed Over Phone" to "Verbally Agreed" on signature window	In the signature window popup where the client signs, one of the options is "Verbally Agreed Over Phone". We're asking if this could be changed to simply "Verbally Agreed". This would include things like verbal agreement over telehealth (e.g. Zoom call), or a someone who is in-person but unable to sign (e.g. physically disabled).	Patient Administration	7		Enhancement - Would be nice to have
Add Language as a search option in Appointment Search	A county requested that Appointment Search include the ability to search by language.	Patient Administration	8		Enhancement - Would be nice to have
Inquiry and Client Information screen syncing	Currently, when completing the Inquiry Details screen, information added in the screen will push to the Client Information screen. While this is desirable upon a client's first encounter with County Behavioral Health, at least one county found it concerning, as the inquiry was also being used to track additional requests. This task explores whether the Inquiry should push data to the Client Information screen automatically, or if there should be an opt-out. If information does push, why not also include the Inquirer as a Client Contact.	Patient Administration	10	Parking Lot	Enhancement - Would be nice to have
Tie Telehealth Mode of Service to Telehealth Consent		Patient Administration	10	On Hold (Parking Lot Z)	Enhancement - Would be nice to have
Staff Calendar Enhancements - Drag & Drop Functionality and Recurring Services from Calendar w/o saving first	Currently, to make changes to an appointment, a user has to click into the appointment and make changes in the service screen. Counties requested that users be allowed to "drag and drop" appointments in the Staff Calendar. Counties also requested that recurrences be edited from the calendar view itself.	Patient Administration	10	Parking Lot	Enhancement - Would be nice to have
Inquiry Screen Improvements	These are some minor changes requests to the Inquiry Details screen, such as no longer needing to click "Save" before being allowed to "Link/Create Client" or to default the start date/time of the Inquiry to the current date/time. UPDATE: CalMHSA is removing this from our list of requested updates at this time. We can re-evaluate in the future, if needed.	Patient Administration	10	Parking Lot	Enhancement - Would be nice to have
AOT	CalMHSA was hoping that AOT needs would be met via the Care Coordination process. Since the Care Coordination process has been put on hold, we're re-starting this as a separate and distinct project. As we learn more about AOT needs, we may create separate tasks as needed.	Sprint Priority Board	1		State Requirement
Create FSP Agreement in SmartCare	A request to build a basic FSP Agreement in SmartCare.	Sprint Priority Board	6	Waiting on Initial Design by Product Management	
Business v. Calendar Days - County Holidays		SysAdmin	1	Review In Progress of New Request	State Requirement
CDAG Inquiry Screen	Some counties hold their Access Lines out as 42 CFR Part 2 providers. We are working on a way to CDAG Inquiries to address this concern. Currently slated for development in August 2024.	SysAdmin	1	Awaiting Streamline Design	State Requirement
[Enh] - Allow for sys adm to have the permission to create and/or modify whiteboard screen		SysAdmin	2		

## Initiatives Report

Name	Public Description	Section/Column	Priority 1-10	Product Management Meeting - Status	Need Determination
Add Delete Confirmations and Guardrails	There have been numerous instances of county users accidentally deleting something, such as a program, client, or staff member. Recovering this information is difficult, and even if deleted correctly, this will often orphan related records. For example, deleting a program will remove the affiliations of the documents that were associated with that program, thereby making them unable to be CDAG'd. We are requesting more guardrails around deleting items, including a confirmation message and a system review to determine if there are any "child" records (meaning records that rely on the record being deleted in order to function).	SysAdmin	2	Waiting on LOE	Essential Modification - Functionality is not present
Need the ability to add Controls created in SmartCare to DFA documents (through DFA functionality)	In SmartCare, there are "controls". An example of this is the Problem List Control, which can be seen on the CalAIM Assessment and the Progress Note. These are items that can be added to documents as a whole section. These controls include functionality that impacts the system elsewhere. For example, adding a problem to the Problem List Control in the CalAIM Assessment means that when you view the Problem List Control on the Progress Note, the problem you added shows up in both places. CalMHSA is working with Streamline to make these controls available to be added to CalMHSA-created documents.	SysAdmin	2	Awaiting Streamline Design	Essential Modification - Functionality is not present
Document Mapping (Categories for Documents list page)	In the "Documents (Client)" list page, there is a filter for the type of document. This filter is dynamic, meaning a document type will only show if the client has such a document at all. However, CalMHSA learned that the creation of these document types is manual. CalMHSA is therefore working to ensure all documents that are active in SmartCare have their type setup so that they can be seen in this filter. CalMHSA is also working to create the "folders", such as "Assessments" and "Progress Notes" to ensure all overarching categories are accounted for.	SysAdmin	2	Deployed to Prod and Completed	Essential Modification - Functionality is not present
Program drop-down to associate to a calendar entry for when adding to the staff calendar	Every service appointment in SmartCare requires a client, program, and provider. However, every calendar entry only requires a provider. This type of event is often used for tracking the administrative tasks done. Sometimes this may need to be tracked to a specific program, however. Counties therefore requested that a Program field be added to the calendar entry for tracking purposes. Estimated to be deployed to QA on 9/26/24	SysAdmin	2	Awaiting Streamline Design	Industry Standard - Functionality requires workarounds
UI Screen for counties to enter MCP information	Allows counties to manage the MCPs in their county. This is a new UI list page and details screen combo. KB Article here: <a href="https://2023.calmhsa.org/how-to-manage-your-medi-cal-managed-care-plans/">https://2023.calmhsa.org/how-to-manage-your-medi-cal-managed-care-plans/</a>	SysAdmin	3		Optimization - Functionality is present but very clunky
Improved QA Environment Coordination	SmartCare works on a hub and spoke model, where CalMHSA's production environment pushes configuration changes down to county affiliate production environments. CalMHSA's QA environment is also supposed to push down configuration changes to county affiliate QA environments. This sync has not been turned on for numerous reasons, including billing testing and state reporting testing that is still occurring out of county QA environments. This has impacted other testing, however. When a new deployment is pushed to QA environments, some setup is often needed. CalMHSA completes this setup and testing in CalMHSA QA, but since this setup doesn't push to the county QA environments, counties are not able to test in their own QA unless CalMHSA makes the configuration changes in all environments separately and manually. CalMHSA is hoping to improve this process so counties can benefit from testing after CalMHSA completes the necessary configurations in CalMHSA QA.	SysAdmin	3	Review In Progress of New Request	Optimization - Functionality is present but very clunky
Add a filter & column for program in 'Documents (Client)'	All documents in SmartCare require a client and a program. CalMHSA requested that a "Program" column and filter be added to the "Documents (Client)" list page so that a user can filter by a specific program.	SysAdmin	3	Post-Prod Review Needed	Optimization - Functionality is present but very clunky
User Role Permission Grid Report	This would be a report that would present all permissions and all user roles in a grid format to show which permissions were granted to which user roles in a way that's easy to compare permissions between user roles.	SysAdmin	3	Bugs Found in QA Review; Working on Bugs, Parking Lot	Optimization - Functionality is present but very clunky
UI for County Holidays	A place for counties to enter in what dates are considered holidays and should not be considered "business days" for reporting purposes (e.g. TADT timeliness measured in business days). This will be permissioned to Sys Admin user roles only (CalMHSA Sys Admin and County Affiliate Sys Admin), though CalMHSA is looking into creating an add-on user role for entering county information such as this.	SysAdmin	4		Optimization - Functionality is present but very clunky

## Initiatives Report

Name	Public Description	Section/Column	Priority 1-10	Product Management Meeting - Status	Need Determination
Have a running historical log of staff accounts that have been locked out of the system	When a staff's account is locked (via incorrect credentials used or incorrect answers to security questions) there currently is no log capturing the date and time of the account lockout. Currently the StaffFailedLoginAttempts table will track if an account has had failed attempts to access, but if the account is locked the log from the table is removed.  CalMHSA is requesting that this history of account lockouts is not removed, and is available for audits and tracking. If someone is attempting to login to a users account, we currently do not have a running log to capture this information and this would be valuable to store.	SysAdmin	4		Essential Modification - Functionality is not present
Inquiry - Add ability to lock Inquiry Details screen similar to Flow Sheets	The Inquiry Details screen is just that - a screen. Screens, unlike documents, cannot be "signed" and "completed". The Inquiry Details screen must be a screen rather than a document, since a document must be associated with a client and a program. The inquiry, by definition, does not require either. That being said, the Inquiry is meant to capture data about an event. That information should be able to be locked down so that others cannot edit the information.  CalMHSA is looking at the "lock" feature used in the Flow Sheets as a potential option and is working with Streamline to determine if this is possible. This would require someone to "lock" the Inquiry. The ability to "unlock" the record and make changes would be permissioned to only supervisory staff.	SysAdmin	6	Parking Lot	Essential Modification - Functionality is not present
Uploading Documents via Scanning/Upload Function capped at 25 mb - request to increase to 100mb	When uploading documents via the scanning/uploading feature, document size appears to be capped at 25mb per document. A county is requesting that this be increased to 100mb.	SysAdmin	6		Optimization - Functionality is present but very clunky
Be able to move, relabel, or hide fields without Streamline development effort	CalMHSA is requesting the ability to move, relabel, and hide fields on a screen without requiring Streamline development effort.	SysAdmin	6		
Create a Letter Template Wizard	An easier method of creating letter templates that do not require all the back-end creation that is currently required.	SysAdmin	7		Enhancement - Would be nice to have
[Enh] - Documents (client) - how to meta tag documents as 'Medical Record'	We need to find a way to indicate, especially to med records, which client documents actually constitute their medical record and are, for instance, discoverable. There are a number of documents that display in 'Documents (client)' that are not considered part of the medical record.	SysAdmin	7		Essential Modification - Functionality is not present
Clinician Error Reporting - Rename		SysAdmin	7	Review In Progress of New Request	
Train Portal: Unread messages do not display in the messages function or the widget	This was originally reported as a bug. Only the initial message sent from a staff member to a client appears in the client's messages. Any replies to that message do not appear.	SysAdmin	8	Parking Lot	Essential Modification - Functionality is not present
Add military time support to SmartCare	Military time, or 24-hour time, is often used in 24-hour settings, such as crisis units, residential facilities, and inpatient hospitals. Currently most fields in SmartCare do not accept the input of military time, or if they do, the field requires a colon to accept the time (e.g. 13:15, but not 1315). We've also heard from counties that it would be nice to be able to select how you prefer time to show (e.g. an inpatient nurse prefers 1315, or 13:15, but an outpatient nurse prefers 1:15p).	SysAdmin	8	Waiting Additional Details from Streamline	Industry Standard - Functionality requires workarounds
Hotkey Hover-Help isn't obvious	CalMHSA is currently using Walk-Me to provide hover-tips. However, sometimes this is clunky, such as when a popup shows over a Walk-Me icon. SmartCare has a built-in method for System Administrators to create hover-tips, but the associated icon is not clear. We had requested very early on in the EHR project to have this icon match Streamline-created hover-tips. This is not something CalMHSA will pay for, but was something we recognized early as a "nice to have".	SysAdmin	8		Enhancement - Would be nice to have

## Initiatives Report

Name	Public Description	Section/Column	Priority 1-10	Product Management Meeting - Status	Need Determination
Add/delete items at scale (example: figure out a way to quickly add more than 1 staff/user to a new program)	Right now when creating a new program, you can't add staff to the program in the program set-up. You have to go to each staff/user profile and add the new program manually. This is very tedious and time consuming. There are numerous other examples of not being able to work at scale. This includes being able to add multiple programs to a user's account at once but having to remove programs one at a time. We're trying to make these types of processes more user-friendly and efficient.	SysAdmin	9	Parking Lot	Optimization - Functionality is present but very clunky
Subreports that get initialized to an RDL: CDAG and Coordinated Care Consent; if a CCC is signed, should this report include items from outside the current program?		SysAdmin	9	Need Manatt Feedback	
Need a way to see what is included in the Primary-to-Affiliate sync and to be able to manage it	CalMHSA's environment syncs with the environments of county affiliates. CalMHSA is looking to be able to see what items are currently syncing and at what level.	SysAdmin	9	Awaiting Streamline Requirements Doc	Essential Modification - Functionality is not present
Tie SMS Reminders to SMS Consent		SysAdmin	10	On Hold (Parking Lot Z)	Enhancement - Would be nice to have
Need a way to see a field is required without having to click on anything	In SmartCare, fields that are required in order for the user to save or sign a document are not clearly marked as such. When a user tries to save or sign, SmartCare will run validation checks and inform the user why they cannot save or sign. This does not label the field itself, but merely references which fields are required. CalMHSA is requesting to have required fields be clearly identified without the user having to attempt to save or sign.	SysAdmin	10	Parking Lot	Industry Standard - Functionality requires workarounds
Add a pop-up at login that lets users know that changes have been made - acknowledge and doesn't show up every time they log in	Changes are often made to SmartCare, such as new deployments or changes to configurations. We've heard from counties that end-users aren't always made aware of these changes. To ensure users are made aware, CalMHSA is considering a pop-up at login that describes any changes made to SmartCare since their last login.	SysAdmin	10	Parking Lot	Enhancement - Would be nice to have
Ability to Share Between Specific CDAGs Rather than All/None	Currently, when the Coordinated Care Consent is signed, ALL CDAG walls are dropped and ALL users can see documents from ALL programs. Counties have requested a way to share between specific programs, or specific CDAGs.	SysAdmin	10	Parking Lot	Essential Modification - Functionality is not present
Adding Programs to Rx Module to allow for CDAG of prescriptions & related documents	The e-prescribing module of SmartCare is not being CDAG'd. This is to allow prescribers to see all of the medications a client is on, which is generally required by the DEA, especially around controlled substances. However, since the data entered into this module does not have an associated program, when that data is pulled back into SmartCare, that data cannot be CDAG'd. This has the potential to result in breaches in the same way that seeing the author of a document is a known SUD Counselor, so too would seeing a prescription written by a known SUD prescriber. Since medical staff already have access to the non-protected information via the e-prescribing module, they are also allowed access to the non-CDAG'd screens in SmartCare that shows the same information. Staff who do NOT have access to the e-prescribing module are not granted permission to view these screens. This often results in the non-medical direct-service staff not being able to see what medications a client is currently prescribed, which can limit care coordination.	SysAdmin	10	Parking Lot	Essential Modification - Functionality is not present
