

## EHR Release Notes: December 12, 2024

Completed Initiative	Release Note
CARE Act Narrative Note	<p>This was reported as a bug by a county. The current CARE Act procedure codes use the Narrative Note, which is used in other non-CARE Act procedure codes and is therefore permissioned to all user roles. CalMHSA will create a new CARE Act Narrative note in order to limit permissions to only the CARE Act Add On user role.</p> <p>UPDATE: scheduled to be deployed to QA on 12/2. CalMHSA will test and then plan to deploy to Prod on 12/8. Should be available in Prods on 12/9.</p>
Psych Medical Note: Medication Consent Document generation as a ready to sign	<p>All PsychNote verbal medical consents are created signed. Previously unsigned verbal medical consents will be updated to signed.</p>
Psych Note: Weight (lb) is missing from Vitals	<p>Weight in lbs will appear in the Psych Note vitals again.</p>

New Document: "Full Service Partnership Agreement"

New Client Consent document created, 'Full Service Partnership Agreement'. This will replace the current workflow for FSP Agreements, where scanned paper versions of this are added to the system.
