

EHR Release Notes: August 7, 2025

Configuration Change	Description
Reset "Allowed to Open Directly" for "Narrative" note screen	A county had a bug where "Allowed to Open Directly" was selected for a progress note. CalMHSA used the sync to reset this by marking this as checked in all environments, letting the sync occur, then unchecking it and letting the sync occur again. This should reset the checkbox to unchecked in all county prod environments.
