

Initiatives Report

Name	Public Description	Section/Column	Priority 1-10
Prevent service edit when staff association does not exist to program	Currently, if a user can see a service via the Service Detail screen, and they are able to edit the Service Detail screen, they are able to make edits to it regardless of whether this service is associated to one of their programs or not. We are requesting that if the service being created/edited is associated with a program that the user is not associated with, the user should not be able to save any changes. This would mean that Sys Admin and County-Level Billers would need to have ALL program associated with their accounts.	Billing, Compliance	1
CARE Act Hearing Notes - Add "N/A - No next court hearing"	This is a design change based on feedback from the county that originally designed these notes. They're finding that sometimes the court is dismissing the case in the middle of the CARE Process. If this occurs, there won't be a next court date. We will look into ways to address this instance (e.g. a new question, an option for "N/A"), but in the meantime, we are looking to briefly disable these validations.	Clinical Documentation/Workflows	1
Stanislaus: Diagnosis does not match Problem List	I'm able to see the problem list appropriately and able to select what problems I worked on during this session. But once I sign the document, the problems without a SNOMED don't seem to be showing up on the PDF. UPDATE: Fix confirmed in Prod 6/18/25	Clinical Documentation/Workflows	1
CalMHSA CARE Act Inquiry Report	This is a report for counties to gather information on CARE Act inquiries, as gathered via the Inquiry Details screen. The information from this report will need to be entered/pasted into the CARE Act reporting workbook for section 4 on inquiries.	Data Dictionary Version 2	1
Diagnosis search does not match Problem List search & blank description when no SNOMED code	The Problem List currently searches by SNOMED codes by default. Since California BH uses ICD-10 codes, we're asking Streamline to include the ICD-10 description as the primary description in the Problem List and to default the code search by ICD rather than SNOMED. This should also address the issues where the ICD-10 code does not have a corresponding SNOMED code. The SNOMED description will still be visible if desired, but the ICD-10 description will take center-stage. This was part of December 2024 development.	Clinical Documentation/Workflows	2
Service Request - List pages don't seem to be working accurately (workgroup issue)	Known Issue: List pages don't seem to be showing the correct results. List pages don't match widget. Some of this is related to workgroups, as it doesn't seem to be filtering by assigned staff or workgroup correctly. Streamline is working on a fix.	Compliance	2
General - Add ability to track all changes made in the system	We would like to be able to track all changes that occur in the system, including what user made the change and when. Right now, this amount of audit tracking would greatly impact performance. However, we still see this as a need. We are currently in compliance with all tracking regulations regarding client chart access, but feel the ability to track changes is key to quality assurance.	Compliance, SysAdmin/System Level	3
Merge clients - inquiries are not included in the merge	Streamline has confirmed that when using the merge client feature, inquiries are not currently included. CalMHSA feels this is a design flaw and is requesting that when 2 clients are merged, any inquiries that are associated with the client being removed be re-associated with the client being kept. No other changes to the inquiry or Client Information should be made (keep historical inquiry information, don't re-push info from the inquiry into the Client Information screen).	Clinical Documentation/Workflows	3
Client Information: ROI log includes revoked ROI with end date of today; risk for potential breach	CalMHSA has reported this as a bug. When a client revokes an ROI, the ROI is updated to have an end date of the revocation date, which defaults to today unless the user changes it. On the Client Information screen on the Release of Information Loo tab, any ROIs with an end date of today are still included in the "currently effective" filter. This means that if a client revoked the release of information	Compliance	3
SI 2 BHIN 24-039 AB-2242 MCCP Care Coordination Plan	This is the initiative to address: BHIN-AB-2242-MCCP-Care Coordination Plan for patients with involuntary holds. We are reviewing this information and awaiting more information from state We will notify counties once there is a plan	Other Documents, Reports, State Requirements	3
Service Request List Pages - Need a way to Allow Sys Admins to See Records NOT Created By/Assigned to Themselves	In order to best protect screen records that can't be assigned to a specific program like documents are, we designed the list pages to only show records created by or assigned to the logged in user or their supervisors. However, there is a need for administrative staff to be able to see any and all records that were created. Example: a system administrator needs to be able to view a request that a user put in in the meantime, we recommend that any staff who needs to oversee or troubleshoot these issues be added as a supervisor to the people they're overseeing.	Urgent Issues	3
C-SSRS - Need "Unknown/Didn't Answer" option	We have heard that many counties use the C-SSRS documents but are having an issue when a client refuses to complete the assessment. One county reached out to Columbia to confirm the appropriate practice when a client was unable or unwilling to continue when mid-way through a screening. In response to Columbia's feedback, we are requesting that a checkbox be added on each C-SSRS document While the C-SSRS forms are not required by DHCS, we understand that many of our counties use them, and therefore are taking steps to ensure they can use them fully.	Clinical Documentation/Workflows	5
[Inpatient] - Enhancement: Add Administrative/Acute Column to Bedboard [EXTERNAL]	[Inpatient] - Enhancement: Add Administrative/Acute Column to Bedboard [EXTERNAL]	Inpatient/Residential/CSU	5
Add language and interpreter fields to Inquiry Details screen	Add Language and Translator information to Inquiry. Language and translation service tracking is required for the NACT.	State Reporting	5
Add/delete items at scale (example: figure out a way to quickly add more than 1 staff/user to a new program)	Right now when creating a new program, you can't add staff to the program in the program set-up. You have to go to each staff/user profile and add the new program manually. This is very tedious and time consuming. There are numerous other examples of not being able to work at scale. This includes being able to add multiple programs to a user's account at once but having to remove programs one at a time in Streamline's roadmap for 2026.	SysAdmin/System Level	8
Add a School Name field to the Custom Fields tab of Client Information	Received a request to add a school name field in Client Information. This would use a global code category that counties would populate with local schools. This is likely a low-hanging fruit type request.	Patient Administration	10
Overarching 40 ticket for CARE Version 3 (Data Dictionary V2.0)	CalMHSA will work to make adjustments to CARE Act reporting once the DHCS Data Dictionary version 2.0 has been finalized, which is expected to be in Feb 2025.	Data Dictionary Version 2	TBD
CARE Act: Need ability to map global codes from Client Info to CARE Act multi-to-one	CARE Act: Need ability to map global codes from Client Info to CARE Act multi-to-one	Design Changes v1.5 (SL Version 2 Rollout)	TBD
CARE Act CPT Crossover: HK Modifier isn't present in the CARE Act Services to CPT Codes Details screen	CARE Act CPT Crossover: HK Modifier isn't present in the CARE Act Services to CPT Codes Details screen	Design Changes v1.5 (SL Version 2 Rollout)	TBD
CalMHSA/Fresno: Workflow for Medical Residents/NPs/PAs writing notes and getting Attending's approval/attestation [EXTERNAL]	CalMHSA/Fresno: Workflow for Medical Residents/NPs/PAs writing notes and getting Attending's approval/attestation [EXTERNAL]	Medical	TBD
CARE Act: Additional development not related to state requirements	CARE Act: Additional development not related to state requirements	Original Design/Request Tickets	TBD
ALL COUNTIES - Coordinated Care Consent (and ROI) in Spanish (and other languages)	With all legal forms, we need to provide the document in the client's language. If someone only speaks Spanish, they can't be expected to understand a document in English and agree to something. We've had the form translated and are using a paper version to provide the client with the information in their language. We then scan that in and associate it with the SmartCare version. That is a workaround, and we are hoping to get these forms in multiple languages in SmartCare.	TBD	TBD
Add configuration key "DisplayOrRemoveRevokedROIinReleaseOfInformationLog"	Add configuration key "DisplayOrRemoveRevokedROIinReleaseOfInformationLog"	TBD	TBD
Ventura, Enhancement Request - Screen to track AOT Client Referrals	Ventura, Enhancement Request - Screen to track AOT Client Referrals	TBD	TBD
Test flow with Referral screen once Care Coordination goes live	Test flow with Referral screen once Care Coordination goes live	TBD	TBD
Hold County shared-decision-making meeting to determine what is missing	Hold County shared-decision-making meeting to determine what is missing	TBD	TBD
